Press Release - Dienst Verpackungstechnik GmbH

Kids party, chilling on the sofa or having it for the start of the new soccer season: Ice-cream always tastes good! Guaranteed with End of line solution by DIENST

Durability thanks to quality.

We are premium manufacturers in the area of horizontal cartoners (side load) within the food industry. In addition, we also sell machines for top load and end of line applications.

We offer customer-specific machine solutions upon request and are a recognized partner of leading international producers in the food and non-food industries.

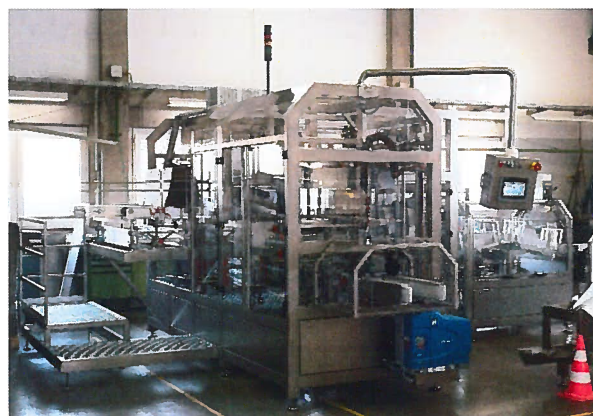

Further information please refer to www.dienst-packsystems.de

Ice-cream does not necessarily have to come out of a carton box. This well-known manufacturer for all sorts of ice-cream, fills the delicious mini-portions into stand-up pouches. Dienst End-of-line packaging solutions is working just as versatile.

With the newly built Wrap-Around Tray Packer of type HE WA the Dienst End-of-Line program has now been completed. Besides that, there are three further models: Tray- and Lid Packer HE TL, Tray Packer Comact C and the well-known American Case packer type HE AC. Dienst has successfully reached the set target of concentrating stronger on the End-of-line area by receiving new orders.

The customer was able to reduce his production costs and optimize the utilisation of pallet capacity through using flat lying carton blanks which are wrapped around the carton within one step only.

The HE WA model is packaging 15 products per minute in up to 8 different products and packaging variations.

What about your product? We pack nearly everything and adapt our machines to your special needs and facility. Give us a call!
